Determine Your Top Values

Determining Your Top Ten Values for Custom Design

Part 1

Take a look through this list of values. Cut the list in half by crossing out those that least describe your values. Then cut the remaining values in half again. And again, until you have the list down to 10 values.

Part 2

Write about these values in your Blueprint of We, as they are the filter through which your actions and decisions are made. They are vitally important for others to understand how you operate.
